PREFACE

Project reported in this manual refers to a documented report of the process followed and the results of original research conducted by a student in fulfilment of the requirements for a bachelor degree. This brief guide covers the Final Project Report/ Thesis formats and other necessary writing rules. This sets a standard by which the quality of the student learning outcomes, writing and submitted work can be maintained.

Appendices are presented as much as possible, to provide examples that the students may follow. Final Project Report/ Thesis failing to follow the provided format will not be accepted for submission. This guideline will summarise the format for the Final Year Project Report/ Thesis. However, the format may differ in each individual school/ faculty, academy, institute or centre with its own additional requirements.

CHAPTER 1: FORMAT OF WRITING

The structure of Final Project Report/ Thesis should include the following:

Preliminary
Front Cover Title Page Declaration of Originality (Approval for Submission) (Copyright) Acknowledgements Abstract and Keywords Table of Contents List of Figures (if applicable) List of Tables (if applicable) List of Symbols/ Notations/ Terminology/ Abbreviations/ Acronyms (if applicable)

CHAPTER 2: CONTENTS OF PROJECT REPORT/ THESIS

The structure of the research report, dissertation or thesis is based on a standard format, which contains the following main sections: PRELIMINARY, MAIN TEXT, REFERENCES, and APPENDIX.

2.1 Preliminary

This section consists in order of the following:

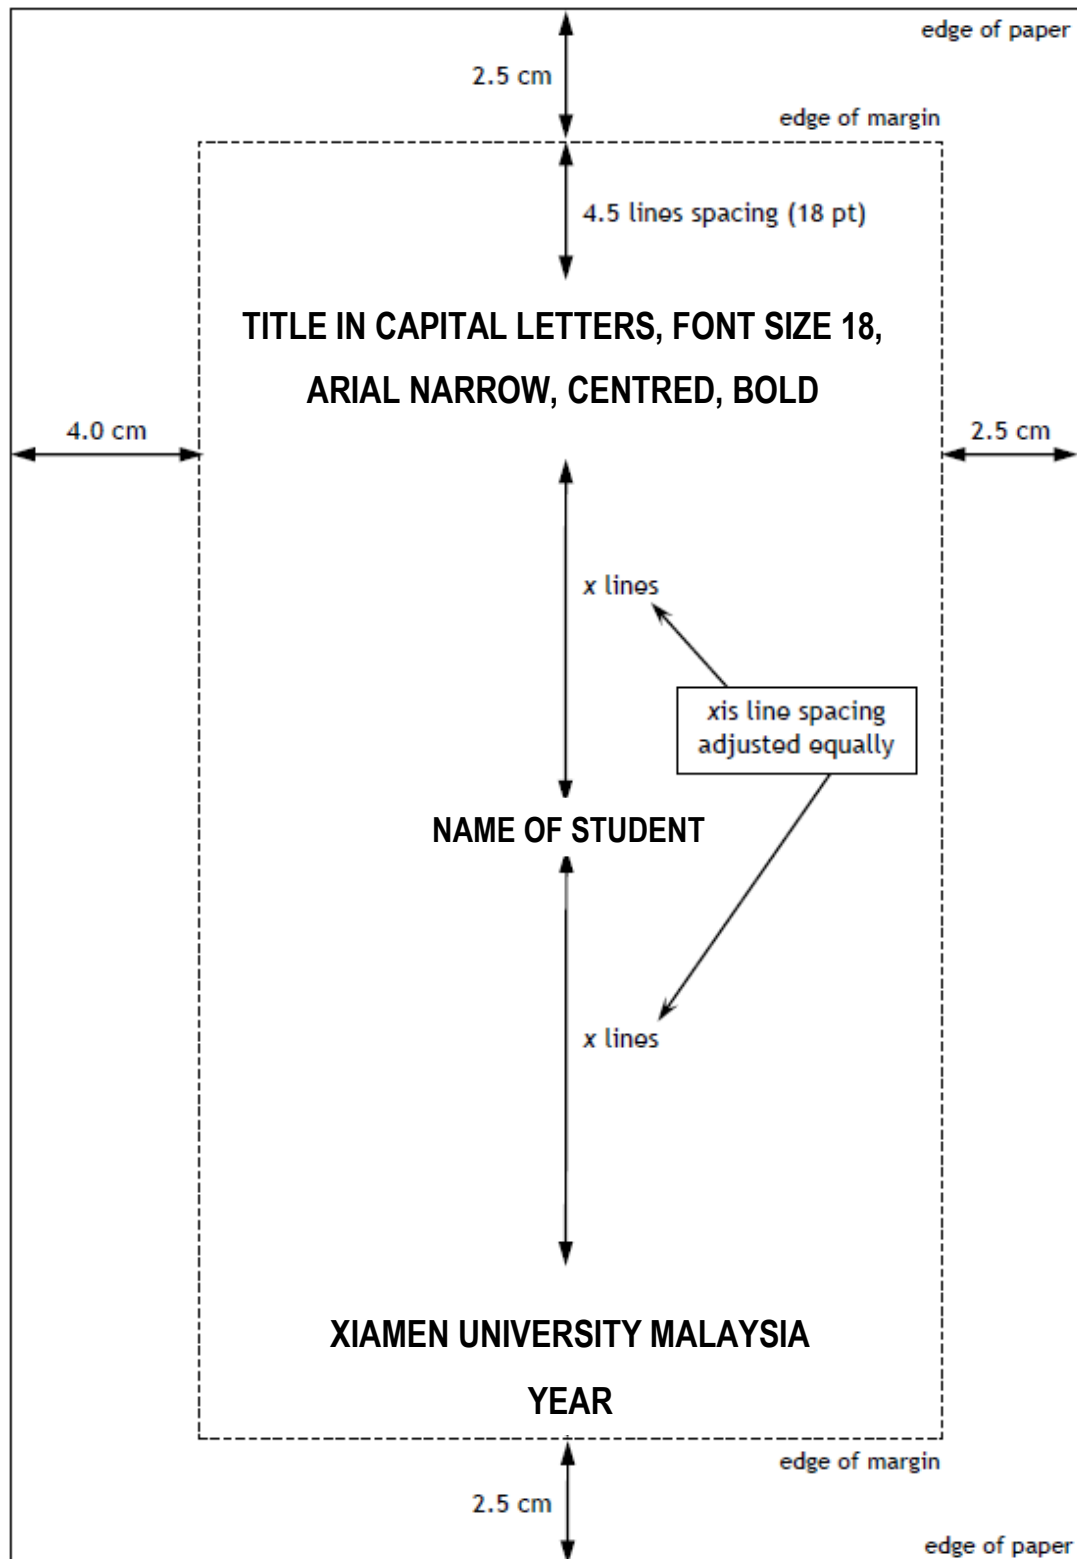

- Front Cover
- Title Page
- Original Literary Work Declaration Form
- (Approval for Submission)
- (Copyright)
- Acknowledgements
- Abstract and Keywords
- Table of Contents
- List of Figures (if applicable)
- List of Tables (if applicable)
- List of Symbols/ Notations/ Terminology/ Abbreviations/ Acronyms (if applicable)

2.1.1 Front Cover

The front cover must contain the information listed in the following order (all in CAPITAL LETTERS):

- Title of the Project Report/ Thesis
- Name of Student
- Xiamen University Malaysia
- Year of Submission

Format of Front Cover:

2.1.2 Title Page

The title page must contain information listed in the following order:

- XMUM Logo
- Final Year Project Report/ Thesis of Degree
- The title of the Project Report/ Thesis must be approved by the School/ Faculty. It should be neat, precise, and generalized.
- Name of candidate according to the registration records
- Student ID
- School/ Faculty
- Programme
- Intake
- Supervisor: Name, Title
- Date

This page is the first page of Roman numeral page number but it is not numbered.

Format of Title Page:

The diagram illustrates the layout and dimensions for a title page. It features a central content area within a larger page frame. Dimensions are indicated by arrows and boxes: 2.5cm for the top and bottom margins, 4.0cm for the left margin, and 2.5cm for the right margin. The top margin is also labeled 'Edge of paper' and 'Edge of margin'. The content area includes the Xiamen University Malaysia logo and name in English and Chinese, followed by the text 'FINAL YEAR PROJECT REPORT/ THESIS OF DEGREE (FONT SIZE 14, TIMES NEW ROMAN)'. The title is centered in bold, capital letters, font size 16, Times New Roman. Below the title, student and supervisor information is listed, with a note indicating font size 12, Times New Roman. The date is at the bottom, font size 14, Times New Roman.

2.1.4 Approval for Submission

Students are to complete the details in the approval for submission page and get it signed by supervisor upon completion of the Final Year Project Report/ Thesis.

Approval for Submission:

The diagram illustrates the layout of the 'Approval for Submission' page. It features a central dashed box containing the following elements:

- Header:** 'APPROVAL FOR SUBMISSION' in bold, centered at the top of the dashed box.
- Text:** A paragraph certifying that the project report/thesis titled 'TITLE TO BE THE SAME AS FRONT COVER, CAPITAL LETTER, BOLD' was prepared by 'NAME OF STUDENT' and meets the required standard for submission in partial fulfillment of the requirements for the award of Bachelor of XXXXXX at Xiamen University Malaysia.
- Signatures:** Two signature lines are provided, one for the Supervisor and one for the Co-Supervisor. The Supervisor's name is pre-filled as 'Prof. Dr. XXXXXXXXXXXX'.
- Dates:** Two date lines are provided, one for the Supervisor and one for the Co-Supervisor.

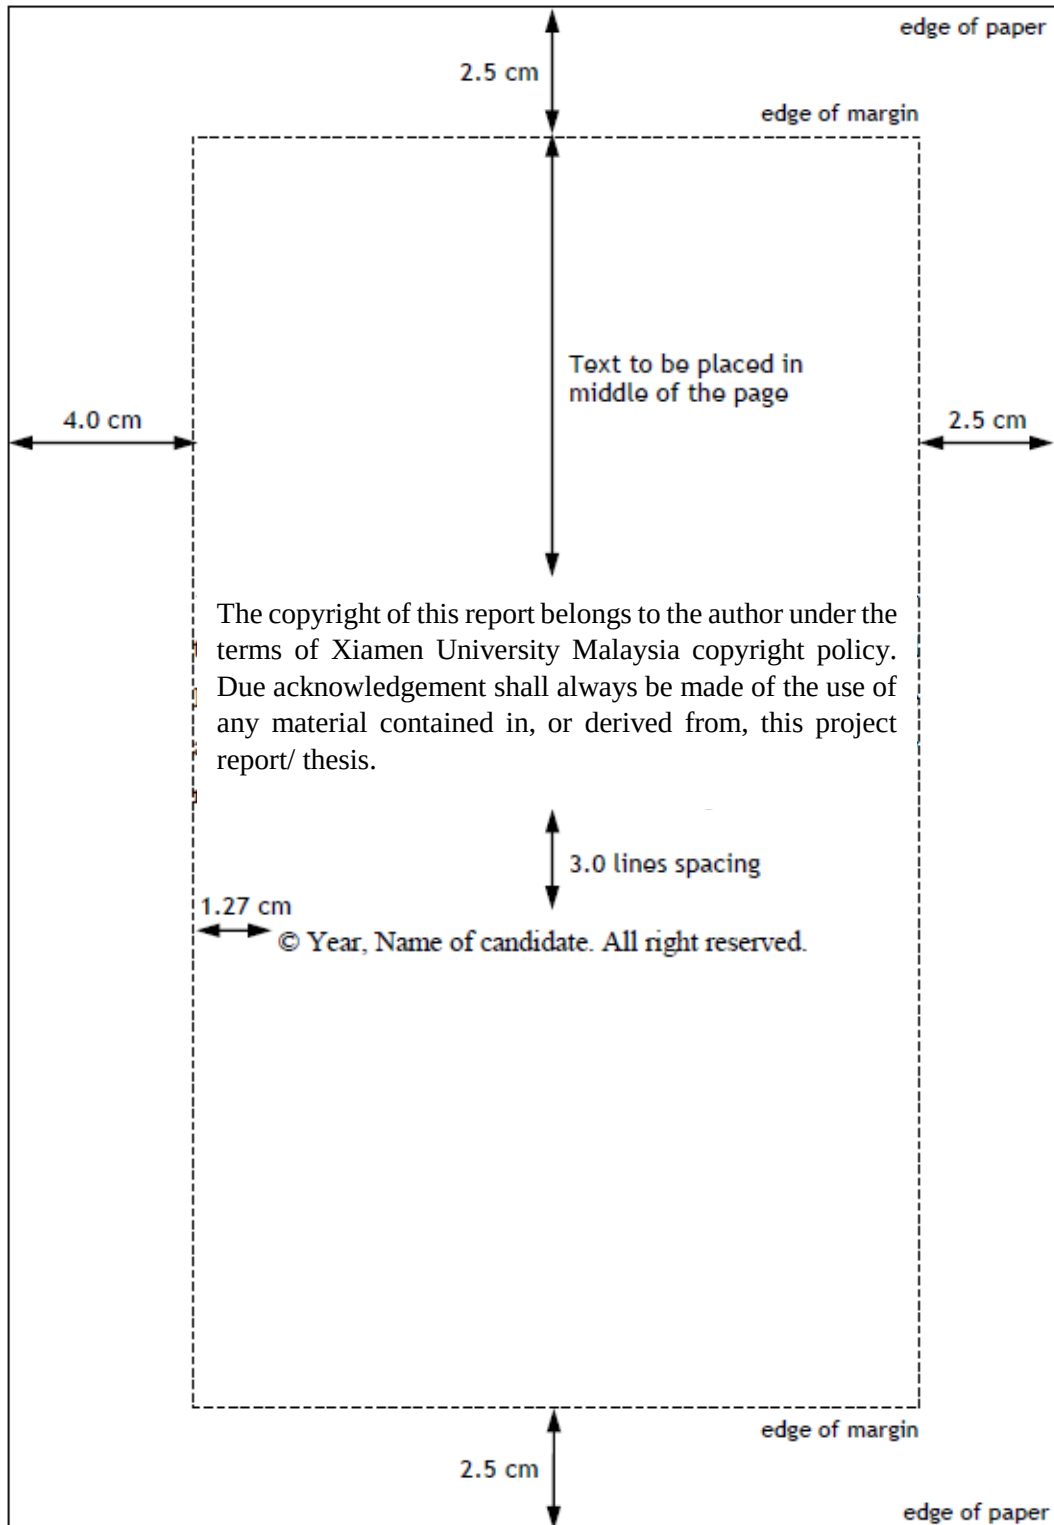

Key dimensions and spacing are indicated by arrows:

- Top Margin:** 2.5 cm from the 'edge of paper' to the 'edge of margin'.
- Left Margin:** 4.0 cm from the 'edge of paper' to the 'edge of margin'.
- Right Margin:** 2.5 cm from the 'edge of paper' to the 'edge of margin'.
- Bottom Margin:** 2.5 cm from the 'edge of margin' to the 'edge of paper'.
- Internal Spacing:** 7.5 lines spacing between the header and the text; 4.5 lines spacing between the text and the first signature line; 4.5 lines spacing between the first and second signature lines; 4.5 lines spacing between the second signature line and the Co-Supervisor's signature line; 1.5 lines spacing between the Co-Supervisor's signature line and the date line.

2.1.5 Copyright

Students are to complete the details in the copyright page according to the format and content.

Format of Copyright Page:

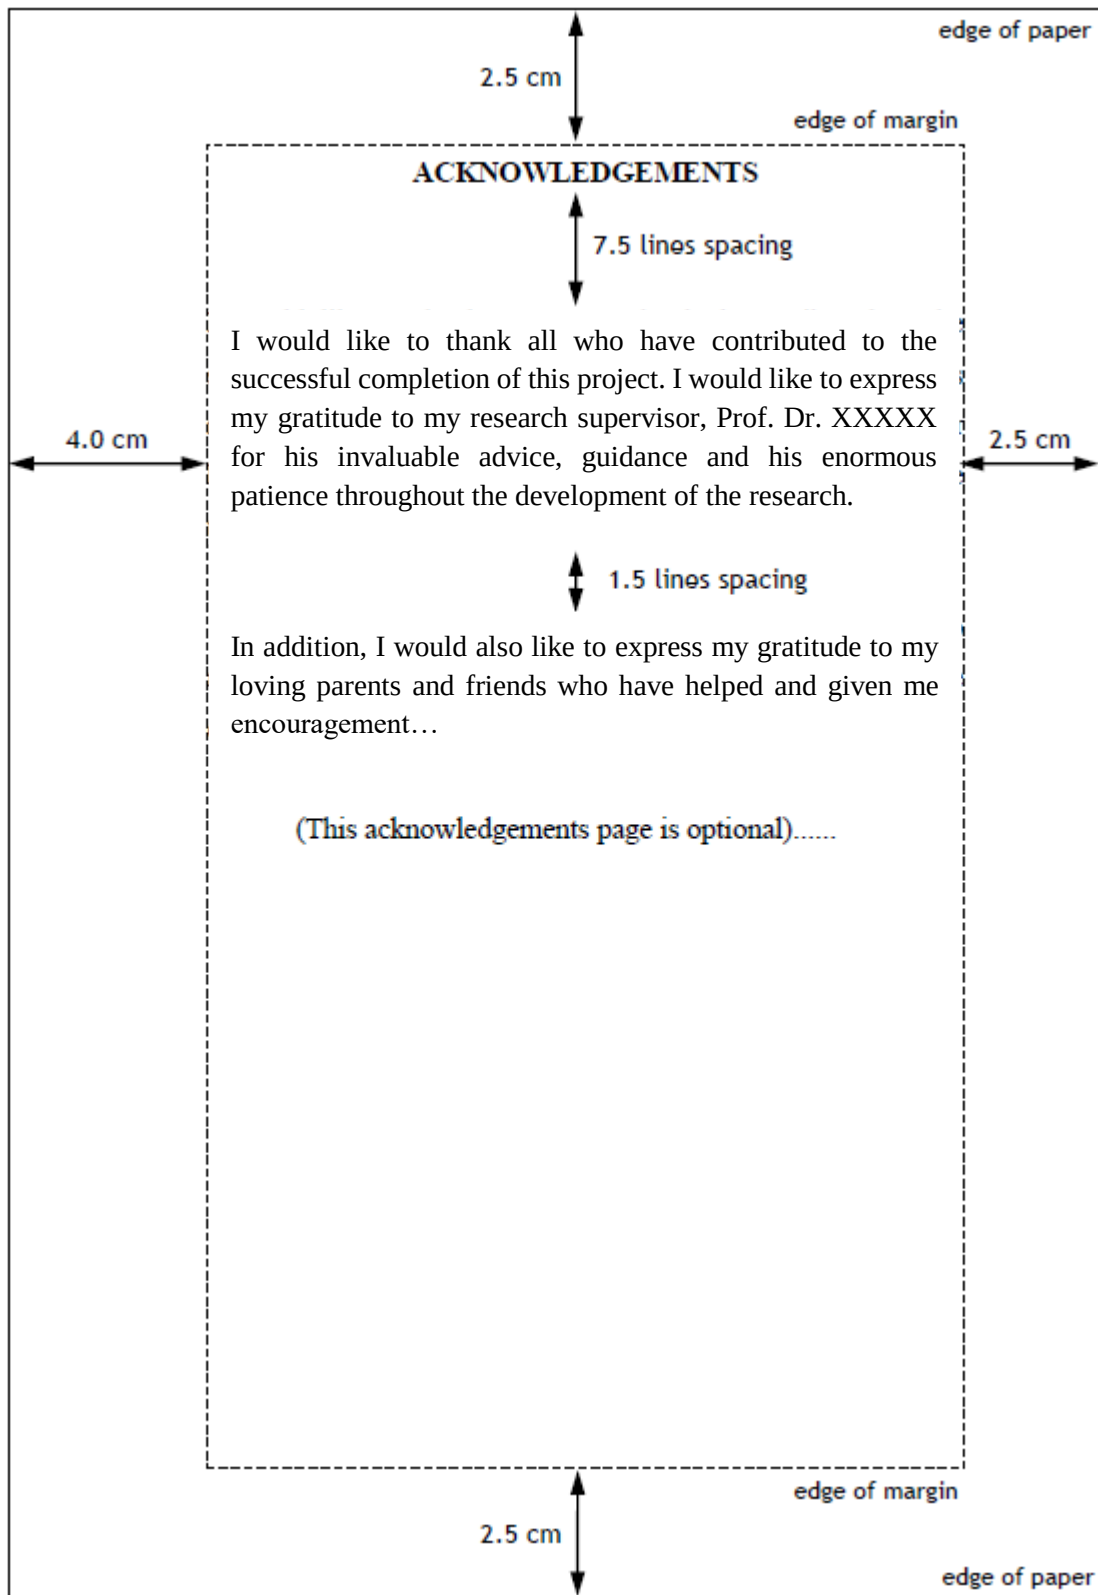

2.1.6 Acknowledgements

Dedication content should be in short brief towards the person that assists on the project report/thesis.

Most project reports or theses include a message to convey the appreciation to those who have been involved and provided their assistance directly or indirectly on the preparation of the study. This is optional and should not exceed a single page, which is numbered in Roman numeral accordingly.

Format of Acknowledgement:

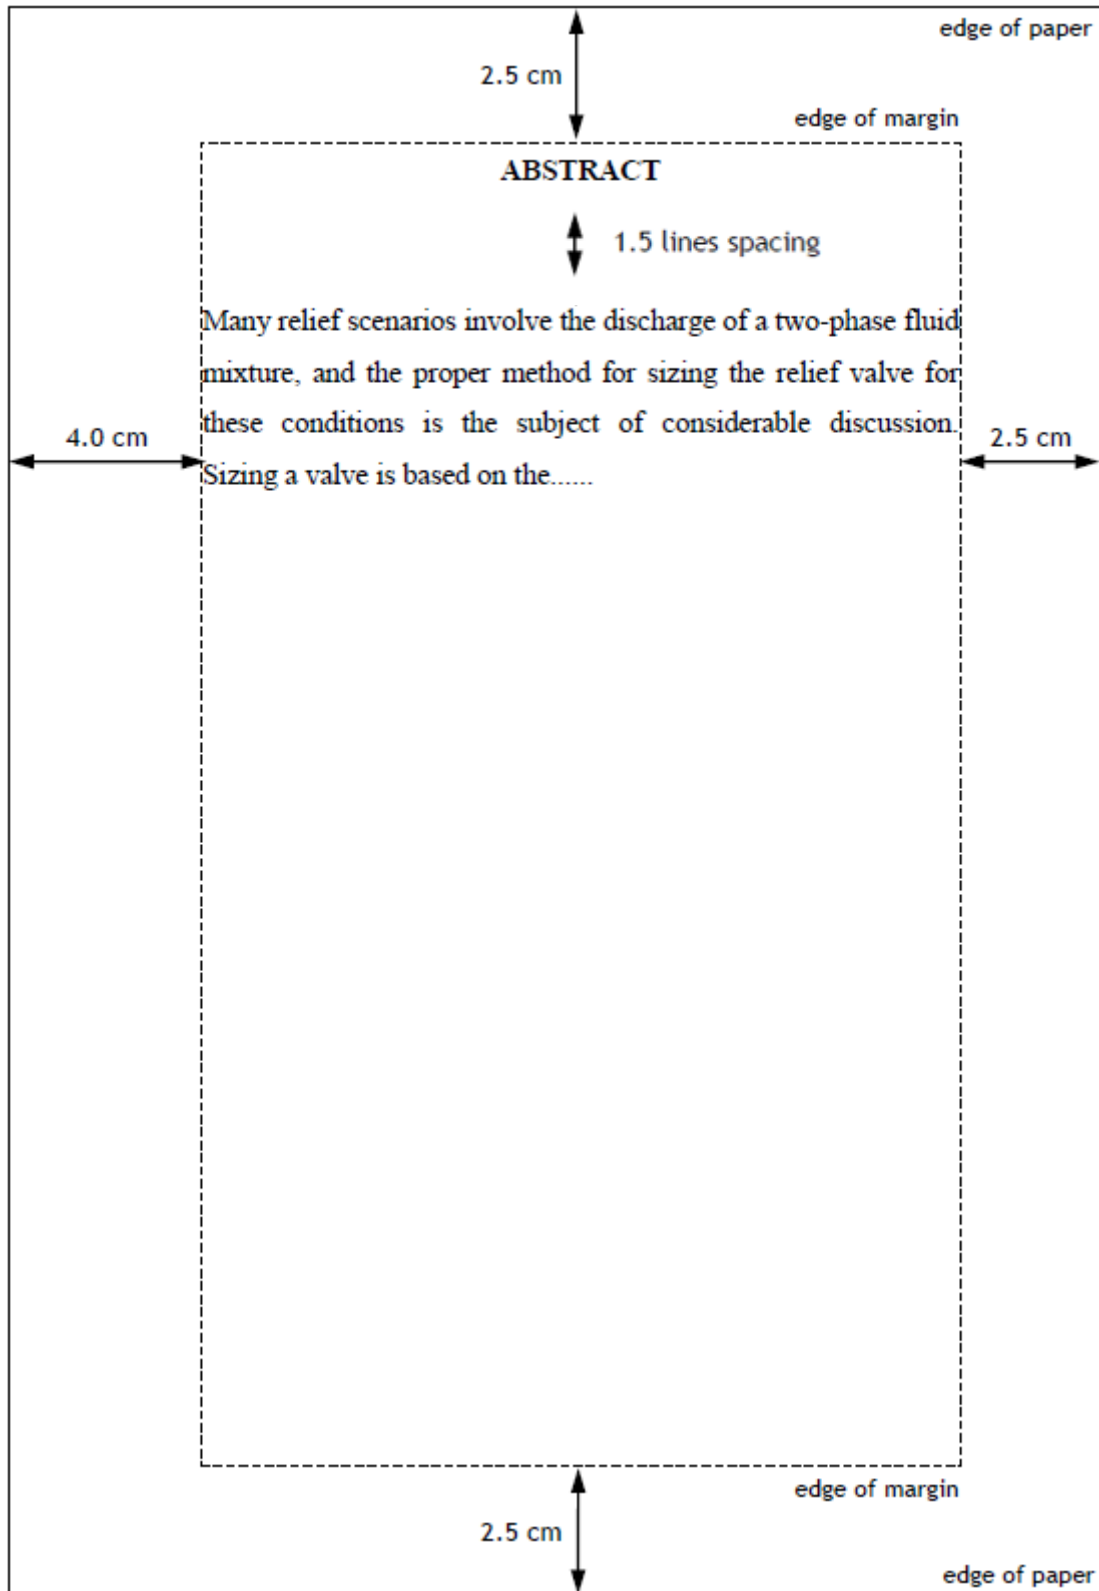

2.1.7 Abstract and Keywords

An abstract is a short summary of the project report/ thesis. An abstract should briefly describe the objectives (problem statement), the significance of research, research methodology, as well as the findings and conclusion of the research.

The abstract should be brief, **not more than 500 words**.

Keywords should indicate the novelty and relevant major points of the project undertaken. A maximum of five (5) keywords could be listed below the abstract, limited to 200 English characters and separated by English semicolons (;).

Format of Abstract Page:

2.1.8 Table of Contents

This page should list all sections, chapters and sub-headings referred to the respective page numbers as reflected in the body of the Project Report/ Thesis. The table of contents shall be a good guide to what are contained within the Project Report/ Thesis.

Topics and sub-topics should be labelled according to the chapter, for e.g.:

CHAPTER 1

1.1 Topic 1

1.1.1 Sub-topic 1

CHAPTER 2

a) Topic 1

i. Sub-topic 1

This numbering system provides a clear picture of the relationship between chapters and topics and shows how they are connected.

2.1.9 List of Tables (if applicable)

This page should list all the tables found in the Project Report/ Thesis together with their page numbers. The tables should be arranged according to the chapters.

The numbering system is according to the chapter, for e.g.: tables in Chapter 1 are numbered sequentially: Table 1.1, Table 1.2 and so on.

Format of List of Tables/ Figures/ Appendices:

2.1.10 List of Figures (if applicable)

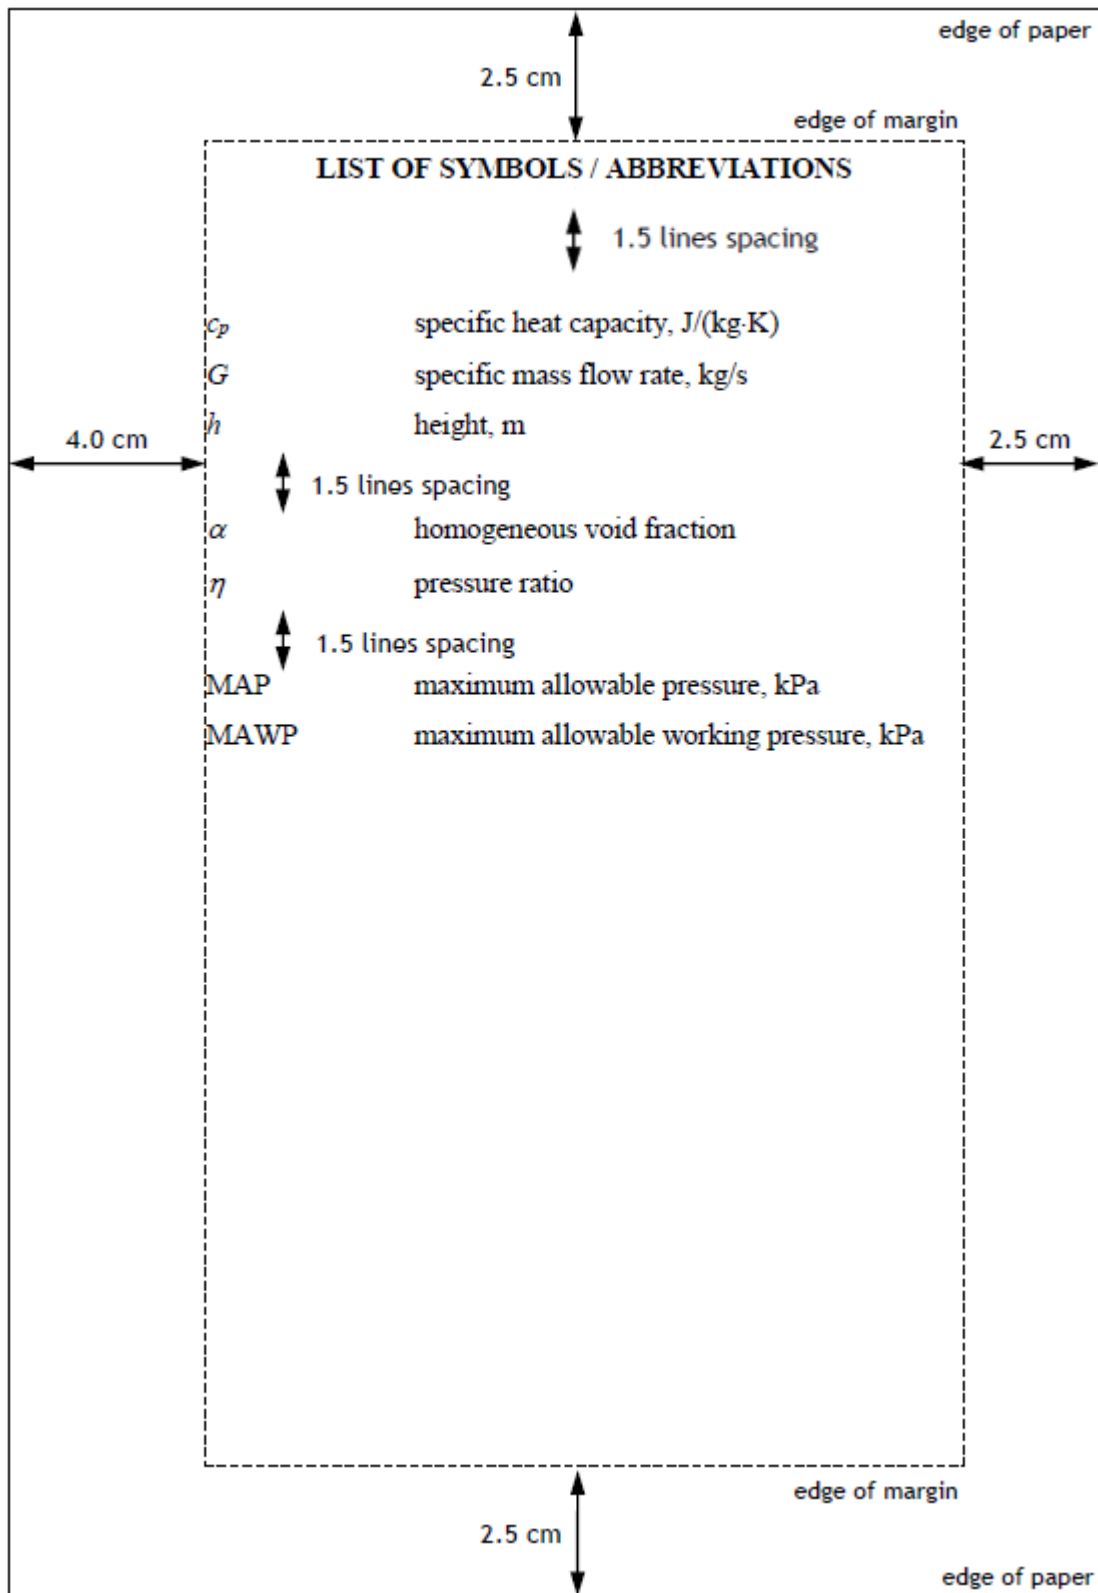

This page should list all the figures found in the Project Report/ Thesis together with their page numbers. Figures include diagrams, photographs, drawings, graphs, charts and maps. The figures should be arranged according to the chapters. For example, figures in Chapter 1 are numbered sequentially: Figure 1.1, Figure 1.2 and so on.

2.1.11 List of Symbols/ Notations/ Terminology/ Abbreviations/ Acronyms (if applicable)

All symbols, abbreviations, notations and terminologies found in the Project Report should be listed on this page according to alphabetical order, together with their units.

For further information on spelling and abbreviations, candidates are advised to refer to the latest edition of the Oxford Advanced Learner's Dictionary published by Oxford University Press.

Format of List of Symbols/ Abbreviations:

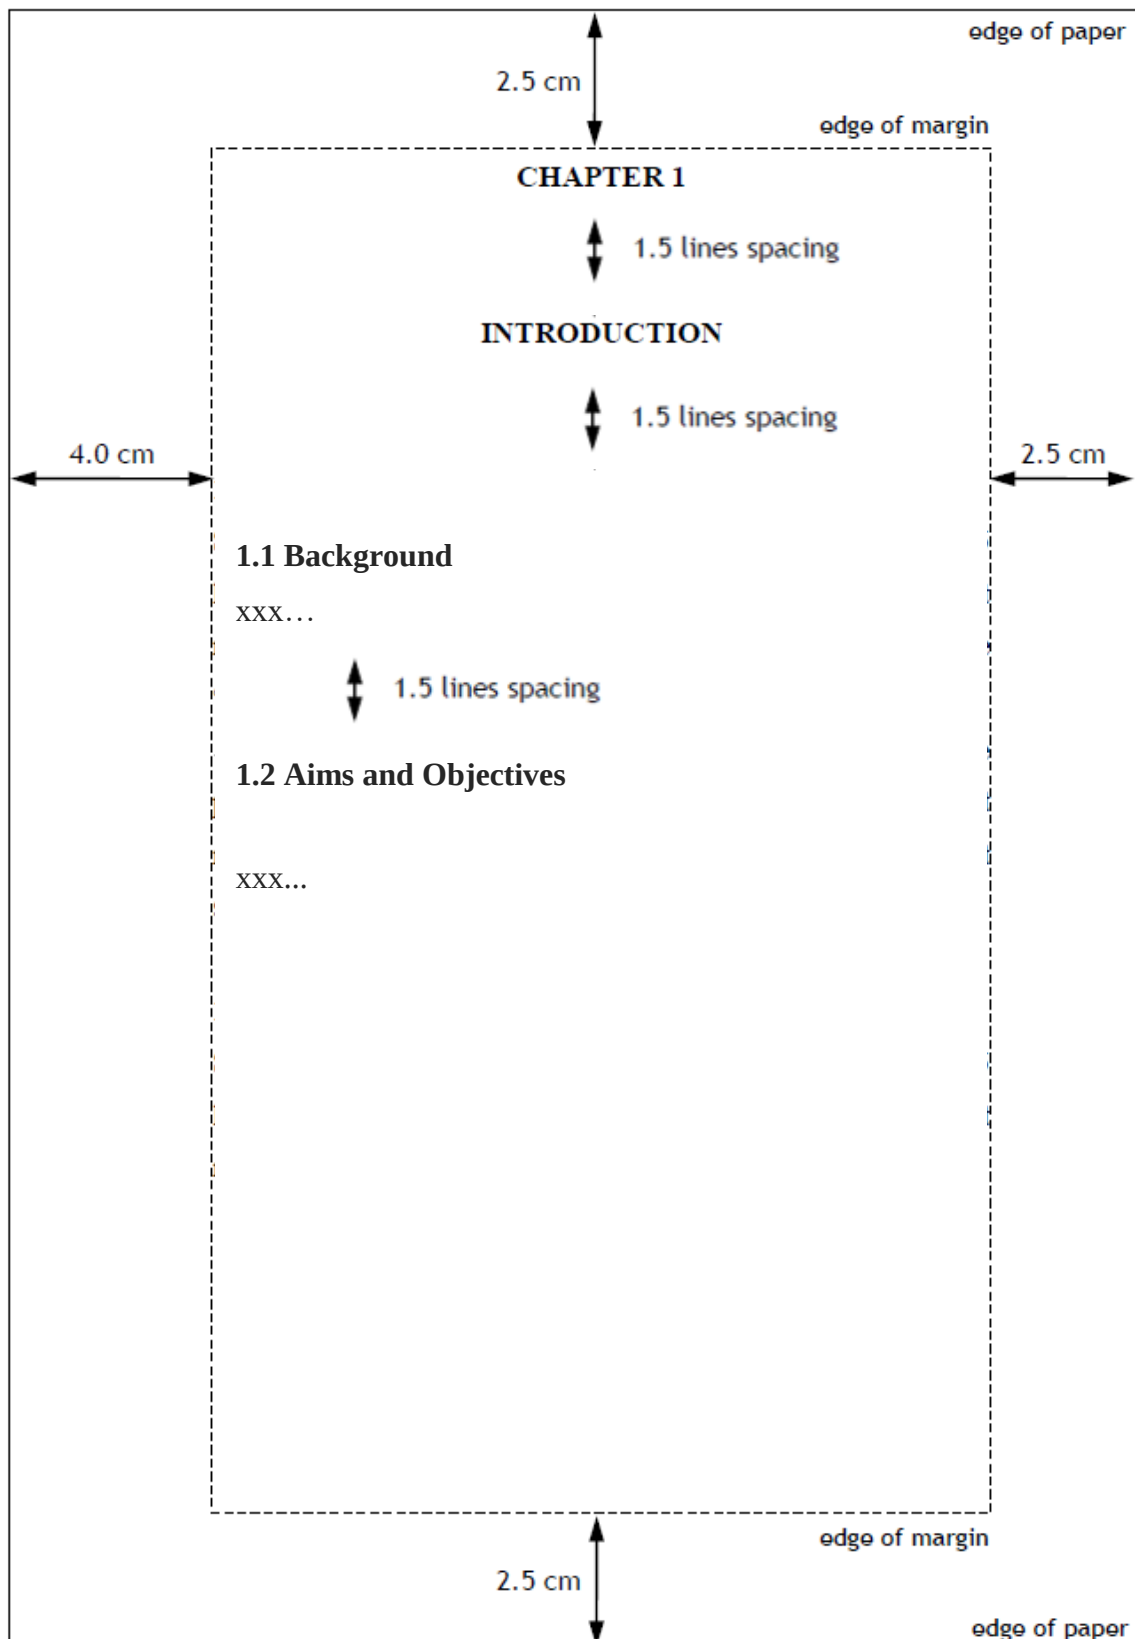

2.2 Main Text

Candidates and supervisors should ensure that the text follows the agreed conventions of the individual School/ Faculty. The main text in the project report/ thesis must be organized following the guidelines as mentioned below:

- Text must be organized in titled chapters.
- Titles must reflect the content of the chapter.
- Every chapter must start on a new page.
- Chapters can be divided into sub-chapters with corresponding sub-titles.
- Titles and sub-titles must be numbered.

Format of Body Text:

There is no restriction on the total number of chapters in a project report/ thesis. The number of chapters differs according to the field of study conducted by the candidate whether it is science-based or social-science-based. However, the content of the chapters may differ according to the candidate's research or conventions of individual School/ Faculty.

The body of the Project Report/ Thesis must be written in paragraphs. There must be continuity or logical flow among paragraphs. Long paragraphs are advised to be avoided.

Generally, a basic structure for the project report/ thesis is as below:

- Introduction
- Literature Review
- Research Methodology
- Results
- Discussion
- Conclusion and Recommendation
- References

The level of English writing must be appropriate to the level of the Bachelor's degree. Attention should be paid to correct spelling, grammar, punctuation, sentence structure and clarity of style.

Normally, no first person references (e.g. I, we, us) shall appear in the report. If self-reference is required, reference may be made to "the author" or "this study". Exceptions are acceptable in the conclusion section, where personal comments may be appropriate.

2.2.1 Introduction

This chapter contains issues concerned, the aims and objectives of the study, and the scope or outline of the research approach as well as the structure of the project report/ thesis.

2.2.2 Literature Review

A literature review is a description of the literature relevant to a particular field or topic of study. It consists of a critically written and comprehensive account of the published works on a topic by accredited scholars and researchers. A critical literature review is a critical assessment of the relevant literature. It is directly related to the research, providing information on theories, models,

materials and techniques used in the research. The literature review should be comprehensive and include recent publications which are relevant to the research.

The literature review should not be just a compilation or reproduction of the works of others. It requires the student to examine and comment critically on the literature relevant to the student's area of research. Students should be aware of that getting hold of the right material is only a small part of the research process, but being able to put ideas, information, data and arguments together in an integrated and coherent manner makes the difference between success and failure.

The literature review should clearly indicate what diversity of views exist among the authors in this area of study, and the student should show how and where his/her research fits in.

2.2.3 Research Methodology

This chapter describes and explains the materials as well as the research methodology used in the study. The sub-topics for this chapter include the key research questions, the research design, and the research procedures adopted. It may also, where appropriate, indicate sampling methods, research instruments and statistical methods employed. The purpose is to inform the reader on the methods used to collect the data and generate the findings reported.

2.2.4 Results

This chapter explains the results that are commonly presented in the form of text, figures and tables, along with data analysis.

2.2.5 Discussion

This chapter contains the interpretation of the results. Findings of the research should be compared and contrasted with those of previous studies presented in the literature review. The purpose of this chapter is to discuss the findings and the outcomes of the research in relation to the results that have been obtained.

2.2.6 Conclusion and Recommendation

In this chapter, findings are summarized and their implications are discussed. This section may include suggestions for future work.

2.3 References

All works or studies referred in the project report/ thesis in the form of quotations or citations must be included in the references.

References should be written consistently in the American Psychological Association (**APA**) format or in another format approved by the School/ Faculty. Each reference should be written in single spacing format and a double space should be left between references.

The **list of references** must be arranged in alphabetical order and the entries should not be numbered. The list must also have a hanging indentation of 0.5 inch.

Refer to details in Appendix A.

2.4 Appendix

Appendices consist of research instruments, additional illustration of data sources, raw data and quoted citations that are too long to be placed in the text.

- Research data, tables, examples of questionnaires, maps, photos and other materials that are too long to be included in the text or are not directly required to comprehend the text can be included as appendices. Tables and graphics that are more than two pages long can be put in the Appendix section.
- Appendices are labelled as APPENDIX A, APPENDIX B, etc.

CHAPTER 3: FORMAT OF PROJECT REPORT/ THESIS

3.1 Page Numbering

Each page of the Project Report/ Thesis must be counted and numbered accordingly. Page numbers should be centred at the bottom margins.

Section	Description
Preliminary Pages	These include title page, declaration of originality, project report status declaration, dedication page, acknowledgements, abstract, table of content and list of tables / figures / symbols. ➤ Numbered using small letter Roman numeric (ii, iii, etc). ➤ The first page is the Title Page. This page is counted as “i” but should not be shown.
Body of the Report	These include all the chapters, references and appendices. ➤ Numbered using Arabic numeric (2, 3, etc). ➤ The first page of a chapter should be counted, but the page number should not be shown. ➤ Numbering for References continue from body text. ➤ Numbering for Appendices continue from references.

3.2 Writing Styles for Date, Numbers and Units

The format for writing units, symbols, numbers etc. in the Project Report/ Thesis follows the International System of Units (SI). The following sections give some common descriptions of the writing styles. For complete and thorough information, refer to the SI Brochure available online at http://www.bipm.org/en/si/si_brochure/.

The use of the correct symbols and names for SI units, and for units in general are mandatory in the Project Report/ Thesis. In this way, ambiguities and misunderstandings in the values of quantities can be avoided.

Style	Description
Date	➤ The international standard (ISO 8601) date notation is YYYY-MM-DD where Y is the year, M is the month and D is the day. ➤ The following date formats are also acceptable (no hyphen): ▪ August 31, 2008 (with comma after the day) ▪ 31 August 2008 (without any comma) ▪ the 31st of August, 2008 (note the comma, “the” and “of”) ➤ Duration in years is written as 1820-1905 or 1983-85.
Numbers	➤ Avoid starting a sentence with a number or symbol. ➤ Number has to be used together with unit; if not it has to be spelled out (e.g. three cats; <i>not</i> 3 cats). ➤ If the number is between +1 and -1, the decimal marker is always preceded by a zero (e.g. 0.15; <i>not</i> .15). ➤ Numbers with many digits may be divided into groups of three by a thin space, in order to facilitate reading. Neither dots nor commas are inserted in the spaces between the groups (e.g. 43 765 589, 58.159 25; <i>not</i> 43,765,589; <i>not</i> 58.159,25). ➤ When there are only four digits before or after the decimal marker, it is customary not to use a space to isolate a single digit (e.g. 5879, 1.5681) ➤ When multiplying numbers, use only the multiplication sign “×” with a space before and after, <i>not</i> centre dot (·) nor the letter “x” or “X” (e.g. 25 × 5.3; <i>not</i> 25 · 5.3; <i>not</i> 25 x 5.3).

Style	Description
Units	If possible, use SI units; although other commonly used non-SI units are also acceptable (e.g. °C for temperature, bar for pressure). <u>Spacing</u> ➤ One spacing between number and unit (e.g. 5 cm, 50 °C, 30 %; <i>not</i> 5cm; <i>not</i> 50°C; <i>not</i> 30%). ➤ Exception for angular degree (°), minute (') and second (") (e.g. 3°, 45') which are placed immediately after the number. <u>Symbols for Units</u> ➤ Use symbol for units and not their abbreviation (e.g. 5 s; <i>not</i> 5 sec.). ➤ Symbols for units are written in upright type i.e. not italic (e.g. m for metres, g for grams). This is to differentiate them from italic type symbols used for variables (e.g. <i>m</i> for mass). ➤ Symbols for units are written in lowercase, except for symbols derived from the name of a person, which start with uppercase. However, the <i>unit name</i> itself is written in lowercase. ➤ Symbols for units are written in lowercase, except for symbols derived from the name of a person, which start with uppercase. However, the <i>unit name</i> itself is written in lowercase. (e.g. the unit for pressure is named after Blaise Pascal; the unit itself is written as “pascal” whereas the symbol is “Pa”; 5 Pa or 5 pascal; 5 J or 5 joule; 5 N or 5 newton) ➤ Symbols are not pluralised (e.g. 5 kg; <i>not</i> 5 kgs). ➤ Symbols do not have an appended period / full stop (.) unless at the end of a sentence. ➤ Symbols derived from multiple units by multiplication are joined with a space or centre dot (·) (e.g. N m for N·m). Hyphens (-) should not be used (e.g. <i>not</i> N-m) [Note: centre dot (·) is different from period / full stop (.); centre dot is available under command Insert > Symbol]. ➤ Symbols formed by division of two units are joined with a solidus (/) (slash (/) is also acceptable) or given as a negative exponent (e.g. m/s or m s⁻¹). ➤ Only one solidus should be used (e.g. kg·m⁻¹·s⁻² or kg/(m·s²); <i>not</i> kg/m/s²). ➤ Do not mix unit symbols and unit names within one expression (e.g. coulomb per kilogram; <i>not</i> coulomb per kg).

	➤ Prefix symbols are attached to unit symbols without a space or hyphen (-) between the prefix symbol and the unit symbol (e.g. km; <i>not</i> k m; <i>not</i> k-m). ➤ The same also apply for prefix names (e.g. kilometre; <i>not</i> kilo metre; <i>not</i> kilo-metre) ➤ Prefix symbols are written in upright type, i.e. not italic. (e.g. kPa; <i>not</i> kPa). ➤ All prefix symbols larger than kilo (10^3) are uppercase; the rest are lowercase (see table above) (e.g. MW, GHz, kW, mg, nm). ➤ All prefix names are lowercase, except at the beginning of a sentence (e.g. megawatt, gigahertz, kilowatt, milligram, nanometre) ➤ A prefix is never used in isolation; and compound prefixes are never used (e.g. 10^{-9} m is nm or nanometre; <i>not</i> mμm or millimicrometre).																																																																													

3.3 Binding

Each copy of the project report/ thesis submitted shall be bound in one (1) volume. The project report/ thesis cover must be of A4 size (210mm x 297mm). The content must be printed with high quality on single sided pages.

For final submission prior to graduation, project report/ thesis submitted should be hard cover bound in rexine with black colour.

The front cover must contain information listed in the following order (all in CAPITAL LETTERS):

- Title of the Project Report/ Thesis
- Name of Student
- Xiamen University Malaysia
- Year of Submission

The letters for the Front Cover should be printed in **gold letterings** of **font size 18, font type Arial Narrow, centred, bold and in uppercase letters**.

The spine of the manuscripts should show the name of student, programme and year of submission. If the manuscripts exceed the space of the spine, a smaller font size can be used (i.e. font size 16 to 14) as follows:

	NAME OF STUDENT	BACHELOR OF MANAGEMENT IN ACCOUNTING	2020
---	------------------------	---	-------------

CHAPTER 4: SUBMISSION

Documents required for final submission prior to graduation after completing the corrections (if any) to be submitted to the School/ Faculty, are as follows:

- One (1) electronic copy (PDF format).
- One (1) printed hardbound copy of the Project Report/Thesis (optional).

Kindly note: In the event that a hardbound copy of the Project Report/Thesis is submitted, it shall be retained by the School/Faculty for their records.

The final Turnitin similarity report must be attached together (cut off: < 25%). The accepted similarity index percentage is subject to the School/ Faculty. The following documents should be attached upon submission:

- Turnitin Digital Receipt
- Similarity Report

The minimum word limit for the Project Report/ Thesis, excluding tables and figures, and references is 10,000 words and must not exceed 30,000 words. However, the word limit may differ in each individual school/ faculty, academy, institute or centre with its own additional requirements.

Students are advised to keep one copy (research proposal and Project Report/ Thesis for their own reference).

CHAPTER 5: PLAGIARISM

Undergraduate candidates of Xiamen University Malaysia are expected to produce original academic work. Plagiarism is defined as the use of original work, ideas or actual texts created by others, without acknowledging the original source. Hence, failure to acknowledge the work of others in their work means the candidate is guilty of plagiarism.

The University highly recommends the usage of Turnitin, an online web-based plagiarism detection application to avoid plagiarism and ensure academic integrity. In most cases, the similarity index percentage should not be more than **25%**. Students will have to hand in the Turnitin similarity report to the supervisor during the Project Report/ Thesis writing process for monitoring. Please refer to your respective school/ faculty regarding the acceptable similarity index percentage.

Reference List : Articles in Periodicals		
Basic Form	The APA style dictates that authors are named last name followed by initials; publication year goes between parentheses, followed by a period. The title of the article is in sentence-case, meaning only the first word and proper nouns in the title are capitalized. The periodical title is run in title case, and is followed by the volume number which, with the title, is also italicized or underlined. Author, A. A., Author, B. B., & Author, C. C. (Year). Title of article. <i>Title of Periodical</i>, volume number(issue number), pages.	
Article in Journal Paginated by Volume	Continuous pagination throughout volume.	Harlow, H. F. (1983). Fundamentals for preparing psychology journal articles. <i>Journal of Comparative and Physiological Psychology</i> , 55, 893-896.
Article in Journal Paginated by Issue	Journals paginated by issue begin with page one in every issue. Therefore, the issue number gets indicated in parentheses after the volume. The parentheses and issue number are not italicized or underlined.	Scruton, R. (1996). The eclipse of listening. <i>The New Criterion</i> , 15(30), 5-13.
Article in a Magazine		Henry, W. A., III. (1990, April 9). Making the grade in today's schools. <i>Time</i> , 135, 28-31.
Article in a Newspaper	Unlike other periodicals, p. or pp. precedes page numbers for a newspaper reference in APA style. Single pages take p., e.g., p. B2; multiple pages take pp., e.g., pp. B2, B4 or pp. C1, C3-C4.	Schultz, S. (2005, December 28). Calls made to strengthen state energy policies. <i>The Country Today</i> , pp. 1A, 2A.
